# TENANT BULLETIN

## VGT Security Enhancements

**WHAT:** Upcoming Pedestrian Gate Access Changes. Existing pedestrian gate keypads will be replaced with proximity card readers.

**WHEN:** November 2026. Pedestrian gate cards are not yet available for issuance. Please wait for a follow-up tenant bulletin before visiting the administrative office to obtain a card. Additional bulletins will provide updates on card availability and the conversion schedule for individual gates.

**WHERE:** Affected gates, 3P, 5P, 6P, 8P, 15P, 22P and 28P.

**WHY:** As part of the North Las Vegas Airport security enhancements project, the existing pedestrian gate keypad units will be replaced with proximity card readers. All users of the affected pedestrian gates will need a proximity card to access those gates once the conversion is complete. Existing vehicle access cards will also work at the pedestrian gates. Private aircraft owners and hangar owners who need a card will be able to obtain one from the airport administrative office during business hours once card issuance begins. Commercial tenants will follow a separate procedure to obtain cards for their flight instructors, maintenance employees, students, and other personnel.

**AFFECTED TENANTS:** North Las Vegas Airport tenants with a contractual relationship, including enclosed hangars, open tie-downs, DOA-approved subleases, or DOA-approved businesses.

**NOTE:** As the project moves forward additional Tenant Bulletins will be posted to notify which pedestrian gates convert and when.
